Supplier Charter – Annual Review 2022

A message from our Head of Supply Chain Services

NatWest Group launched its purpose-led strategy in 2020, which continues to put sustainability at the heart of our future. We are building a more sustainable bank, bringing stronger governance, stronger policies, and a more sustainable framework at the centre of our strategy, creating a more sustainable value for a wider range of stakeholder groups.

Our Supplier Charter (which replaced our supplier code of conduct) sets out our aims and expectations in the areas of ethical business conduct, human rights, environmental sustainability, diversity and inclusion, the Living Wage and prompt payment. It details what we expect from our suppliers, but also outlines our own commitments in these key areas and the outcomes we aim to achieve by working together.

Working alongside the Group Chief People and Transformation Officer, the new Accountable Executive of our Supplier Charter, we have now completed our annual review of the Charter. As you will see it continues to help us become a more sustainable business, delivering better outcomes for our customers, our colleagues, our shareholders and the communities in which we operate.

Central to the aims of our supplier charter, we worked with [EcoVadis](#) – a leading organisation providing third-party evidence-based assessments of sustainability performance. EcoVadis are helping us to understand and measure our own performance and that of our suppliers against the charter, enabling us to identify social, environmental and ethical improvements.

NatWest Group has made significant progress in the first year of working with EcoVadis, with over 525 suppliers rated, representing c.88% of its in-scope 3rd party spend being assessed against ESG credentials. EcoVadis also conducted a sustainability assessment of NatWest Group, scoring 62% which is significantly higher than the global EcoVadis average of 49% for the financial services sector. This ranks NatWest Group in the 86th percentile.

If you have been invited to take part in our EcoVadis Sustainability assessment, I am delighted that you are coming on this journey with us. If this is your first time completing a sustainability assessment, you have made an excellent move in helping plan for a more sustainable future, and NatWest is proud to work with you.

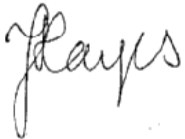

Being purpose-led is not only the right thing to do, but it is increasingly important that we work collectively to help reduce carbon emissions. COP26 highlighted the urgency for action to reduce the impact of rising global temperatures and climate change, building on firms to use their carbon reduction actions to lead society in the move towards a sustainable future. Our supplier practices, and yours in turn have a fundamental impact on our products' and services' social, ethical and environmental footprint.

Alison Rose (CEO) and the NatWest Group Executive Committee have set an ambitious goal of reducing our scope 3 emissions by 50% by 2030, and 90% by 2050, so there is a huge focus on how we start to work with our suppliers and customers on their Scope 1 and 2 emissions and build the ability to measure and report it together. Your data

enables us to measure and monitor our own indirect climate impact which I'm sure you're aware is key contributor in achieving Net Zero. If you are able to report your Scope 1 and 2 Emissions data, then please do so through either the "CSR Metrics" module of the EcoVadis platform, or ensure it can be made available to us when requested. We are in the process of scoping out a multi-year programme to work with our supply chain to reduce carbon emissions, we look forward to engaging with you in the near future, to hopefully build a strong partnership to reduce our collective emissions.

We thank you for your continued engagement and are proud to have you as part of our diverse supply chain. Working together, towards common aims, will encourage and enable a supply chain that is sustainable and has a long-term positive impact on the global community.

If you have any questions then please reach out to your supply chain manager, who will be happy to assist you.

John Hayes,
Head of Supply Chain Services
