

Sustainable energy funding and financing: Noted below is the funding provided to customers during 2018 and 2019 to fulfil our three year commitment to provide £10 billion of funding and financing to the sustainable energy sector by 2020.

Sustainable energy lending: Loans towards low carbon and environmental assets as well as companies and funds that operate in this sector.

Green and sustainable bond and private placements: Debt capital market issuance for sustainable energy projects and clients that operate in this sector

Green and sustainable market funding: Other market funding facilities to support customers' transition to the low carbon economy including Sustainability Linked Loans which enables borrowers to incorporate sustainability objectives and targets into the banking facilities.

The above includes continued financing of low carbon generation and energy efficiency projects, as well as an increased focus on energy efficiency in real estate and alternative fueled vehicles.
